

HD DIGITAL MULTI-FUNCTIONAL LENS

KIRKLAND
Signature

Kirkland Signature HD Digital Multi-Functional Lenses are an excellent solution for near and intermediate vision, solving most limitations of other glasses used for near activities. It is an ideal lens for presbyopes with special needs for intermediate and near vision. Wearers will benefit from wider intermediate (up to 6ft) and near visual fields combined with exceptional comfort.

Combining an outstanding occupational design with the advanced Camber™ technology, HD Digital Multi-Functional Lenses give wearers an excellent visual experience with spacious reading zones, improved peripheral vision, and expanded Rx range, better looking lenses in many prescriptions, and user-preferred near vision performance.

READING TEST

Most people spend over 80% of their day using close-up to mid-range vision. Yet, most popular glasses offer limited vision correction. Reading Glasses have one strength—for close-up work, not offering any mid-range vision. Bifocals offer two strengths but have annoying hard lines and areas of distortion in the field of vision. Wearers often complain that they are cosmetically unappealing. Progressive lenses get rid of the bifocal seams, but offer limited vision in the all-important middle range. Now there's a great way to achieve better close-up to mid-range vision: HD DIGITAL Multi-Functional lenses. A unique lens that's designed especially for computer users, hobbyists, and anyone whose work requires good close to mid-range vision. HD DIGITAL Multi-Functional lenses feature anti-reflective treatment and a state-of-the-art digital design. HD DIGITAL Multi-Functional lenses are the ideal second pair of glasses for the workplace! HD DIGITAL Multi-Functional lenses recreate the experience of normal, healthy vision in close-up to mid-range environments... like your workplace, computer area, home, kitchen or tool shop. HD DIGITAL Multi-Functional lenses give you seamless, wide and clear vision for close-up and mid-range activities, providing the ideal solution for the workplace and at home. No annoying visible bifocal lines to distract you. You'll have a full range of vision from edge-to-edge, with minimal distortions. Every part of an HD DIGITAL Multi-Functional lens offers clear, accurate vision. Life looks better through HD DIGITAL Multi-Functional lenses.
