

# NEOCHROMES FREQUENTLY ASKED QUESTIONS

Below are answers to some of the most common questions about Neochromes.

## ➤ 1. WHAT ARE NEOCHROMES?

Neochromes photochromic lenses are advanced ophthalmic lenses that automatically adjust to changing light conditions. **They darken in direct sunlight and lighten indoors** or in low-light environments.

## ➤ 2. HOW DO NEOCHROMES LENSES WORK?

Neochromes lenses contain photosensitive molecules that react to ultraviolet (UV) light. **When exposed to UV rays, the lenses darken** to shield the eyes from bright light. **Indoors, they return to a clear state** as UV exposure decreases.

## ➤ 3. HOW LONG DOES IT TAKE FOR NEOCHROMES LENSES TO CLEAR AFTER DARKENING?

The clearing process typically takes just a **few minutes** once the wearer enters an area with reduced UV light. The exact timing may vary based on environmental conditions.

## ➤ 4. DO NEOCHROMES LENSES PROTECT AGAINST UV RAYS?

Yes, Neochromes lenses **block 100% of harmful UV rays**, ensuring comprehensive protection for the eyes in bright conditions.

## ➤ 5. WHAT COLOR OPTIONS ARE AVAILABLE?

Neochromes lenses are available in **two stylish shades—gray and brown**—allowing users to choose a color that complements their personal style.

## ➤ 6. ARE NEOCHROMES LENSES SUITABLE FOR ALL AGES?

Absolutely. Neochromes lenses are **designed for individuals of all ages** who want clear, comfortable vision with reliable UV protection in various lighting conditions.

## ➤ 7. CAN NEOCHROMES LENSES BE USED FOR OUTDOOR SPORTS?

Yes! Neochromes lenses are **perfect for outdoor activities and sports**. Their ability to adapt to changing light ensures sharp, protected vision in any environment.

## ➤ 8. WHAT MAKES NEOCHROMES LENSES BETTER THAN OTHER PHOTOCHROMIC LENSES?

Neochromes lenses are known for their **rapid light adaptation, exceptional comfort, and superior UV protection**—all at a competitive price point.

## ➤ 9. HOW CAN I TELL IF I HAVE OCULAR PHOTSENSITIVITY?

You might have ocular photosensitivity if you experience:

- Frequent eye itching
- Squinting or discomfort in bright light
- Difficulty adjusting to sudden light changes
- Excessive tearing
- Light sensitivity from screens (phones, computers, etc.)
- Red or irritated eyes

## ➤ 10. HOW SHOULD I CARE FOR MY NEOCHROMES LENSES?

**Caring for Neochromes lenses is simple.** Clean them regularly with a microfiber cloth and gentle lens cleaner. Avoid harsh chemicals to preserve lens quality.
